-----

3M(TM) Ultra-Clear Solar Film (UCSF) is a clear UV-blocking window film that rejects infrared (IR) light to help protect delicate electronics, head-up display (HUD) systems and picture ...

This solar control film enhances comfort by reducing glare and heat inside spaces while maintaining visibility and aesthetics. It features a clear appearance and can be easily cleaned, ...

Performance - Multilayer Optical Film technology reflects infrared heat with minimal reduction of visible light and neutral color. Additionally the film ...

As one of the world's leading suppliers of advanced films, tapes, coatings and adhesives, 3M has the ability to supply innovative, high-efficiency products and technical support around the ...

3M(TM) solar control window film redirects sunlight, reduces heat, and blocks UV rays to increase comfort and improve your buildings energy efficiency.

Performance - Multilayer Optical Film technology reflects infrared heat with minimal reduction of visible light and neutral color. Additionally the film has low visible reflectivity and low absorption.

3M(TM) Solar Encapsulant Film EVA9100 is specially designed for the purpose of easy PV module manufacturing and high PID resistance. It is compatible with most existing lamination ...

It maintains the visible light transmission and natural color of laminated glass while reducing infrared heat. Ideal for applications where clarity and vision through the glass are desired but ...

Technical Information: The technical information, recommendations and other statements contained in this document are based upon tests or experience that 3M believes are reliable, ...

From durable films that can replace glass to the adhesives that hold panels in place, 3M solar products are engineered to enhance performance and improve reliability.

3M(TM) Sun Control Window Films are designed to help reduce the amount of solar heat transmission through window glass by increasing the solar reflection (not necessarily visible ...
