How much does a solar inverter cost?

Inverter costs usually range from \$1,000 to \$3,000, depending on your solar energy system's total power capacity. Three of the most popular options for solar inverters are string inverters, microinverters and solar generators. Microinverters make it much easier to add more solar panels later on.

Which solar inverter is best?

CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025. It was the most efficient inverter we looked at, letting you use a larger percentage of the energy your solar panels generate. This translates to less and more power to use around the house.

What is a hybrid solar inverter?

Hybrid inverters are designed to work with hybrid solar systems (aka solar-plus-storage systems). They have the same functionality as a grid-tie inverter, but can also charge and draw power from a battery setup.

Which solar inverter should I buy in 2025?

Every solar system needs some kind of inverter to convert sunlight into usable electricity. CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025.
