---

The nation has set an ambitious goal of sourcing 100% of its electricity from renewables by 2030, and solar power is set to play a ...

At the moment, wind power accounts for about 11% of Austria's total electricity output. The share of photovoltaics in Austria is growing rapidly ...

Renewable energies are the economic engine of the future worldwide. Here you can find selected data on Austria's renewable energy sector.

Renewable energies are the economic engine of the future worldwide. Here you can find selected data on Austria's renewable ...

In June the provinces of Upper Austria (433 GWh) and Carinthia (347 GWh) generated the highest energy surplus and made it available throughout Austria via the APG grid.

This report provides an in-depth analysis of Austria's PV market and developments over the past year. 2023 was a landmark year for PV ...

Austria aims to achieve a 100% renewable electricity production by 2030 with 1,000,000 homes having solar panels fitted by that date. 11 TWh of extra photovoltaics will be needed above ...

This report provides an in-depth analysis of Austria's PV market and developments over the past year. 2023 was a landmark year for PV installations in Austria, with a total of 2.6 GW of new ...

The framework and incentives have the potential to increase localized energy production and reduce the need

to transport power through large trans-regional networks. ...

Electric production in Austria derives from several sources. In 2022, it generated 60 billion kWh; 15 billion kWh came from fossil fuels, while 47 billion kWh were generated using renewables. ...

At the moment, wind power accounts for about 11% of Austria's total electricity output. The share of photovoltaics in Austria is growing rapidly and already accounts for 7 percent of total ...

In 2024, Austria achieved another year of record photovoltaic (PV) deployment, adding 2.51 GW of new capacity and bringing cumulative installations to 9.4 GW (DC). PV generation reached ...

Sonja Wogrin: Austria's electricity consumption will rise sharply by 2040 and may almost double. Depending on the electricity demand in 2030 and available demand-side ...

The nation has set an ambitious goal of sourcing 100% of its electricity from renewables by 2030, and solar power is set to play a pivotal role in meeting this target. These ...
