-----

Explore bonding, thermal management, fireproofing, sealing and coating solutions for electric vehicle (EV) and hybrid vehicle (HV) battery pack and module assembly.

Battery factories assemble the individual battery cells into a functioning battery pack with a battery management system (BMS) and thermal management system (TMS) and enclosure. Some ...

With over 15 years of experience in battery manufacturing, we have established ourselves as experts in battery assembly solutions, especially module and pack. In our portfolio you will find ...

MARTORELL, Spain--A state-of-the-art battery assembly plant recently opened here to support electric vehicles made by Volkswagen Group.

Locations are currently under evaluation. The first facility will focus on battery pack assembly and is planned for near-term development. The second, targeting battery cell ...

Discover how advanced joining, tightening, and process control technologies optimize the EV battery manufacturing and assembly process for greater quality and efficiency.

As the demand for electric vehicles and portable electronics soars, the efficiency of manufacturing lithium battery packs becomes more critical than ever. An optimized assembly ...

At Lithium Battery Company, we specialize in advanced battery pack assembly for OEMs and energy innovators. Our U.S.-based facility delivers scalable, automation-first solutions across ...

At JR Automation, we design and build automation solutions for every step of the EV battery module and pack assembly process. Whether you are looking to automate one step of your ...
