-----

There are exponential opportunities for energy storage investments to facilitate the green transition, main developers and operators in Southeast Europe said at Belgrade Energy Forum.

The Serbian government has called for the development of a spatial plan for six large-scale solar plants with a cumulative capacity of 1 ...

In October, Suez said it signed an agreement to invest 300 million euro (\$369.8 million) in the construction of a waste-to-energy facility in Belgrade in consortium with ...

Quick Summary: As Belgrade embraces renewable energy solutions, advanced energy storage systems are becoming critical for grid stability and cost efficiency. This article explores ...

A sudden power outage hits Belgrade during peak tourism season. Hotels lose AC, traffic lights go haywire, and ice cream shops face a meltdown (literally). Enter mobile energy ...

The Serbian government has called for the development of a spatial plan for six large-scale solar plants with a cumulative capacity of 1 GW that will be colocated with two ...

throughout Eurasia and Latin America. This includes the development, design, engineering, construction, and commissioning of utility-scale solar PV plants with energy storage facilities to ...

In October, Suez said it signed an agreement to invest 300 million euro (\$369.8 million) in the construction of a waste-to-energy facility in Belgrade in consortium with Environment ...

The contract is the latest in a line of solar projects backed by Serbia's Ministry of Mining and Energy this

year, which includes plans for a 1 GW solar panel factory and another ...

The contract is the latest in a line of solar projects backed by Serbia's Ministry of Mining and Energy this year, which includes plans for ...

Modernizing district heating systems requires strategic planning, renewable energy integration, and compliance with efficiency standards. Investing in thermal energy storage ...

As we approach Q4 2025, watch for Belgrade's first virtual power plant aggregating 5,000 residential storage units--a game-changer for grid flexibility during winter peaks.
