-----

This innovative solution has been widely adopted for residential energy storage, offering homeowners a reliable and long-lasting alternative to traditional lithium-ion batteries.

In addition to the accelerated development of standard and novel types of rechargeable batteries, for electricity storage purposes, more and more attention has recently ...

Brussels, December 2025 -- The EU-funded EMPHASIS project has successfully concluded, delivering a new generation of sustainable, high-performance supercapacitor technologies ...

Welcome to our European Market Outlook for Battery Storage 2025-2029 Though the battery energy storage revolution continued to unfold across Europe in 2024, setting yet another ...

This innovative solution has been widely adopted for residential energy storage, offering homeowners a reliable and long ...

This report involved significant engagement with subject matter experts and others who are familiar with supercapacitors and energy storage more broadly. Thank you to all of the ...

In addition to the accelerated development of standard and novel types of rechargeable batteries, for electricity storage purposes, ...

It is the site of the largest permitted battery energy storage system (BESS) on the continent at 2.8GWh, one of the largest under construction at 800MWh, and two under ...

By synthesizing these state-of-the-art advancements, this review outlines a roadmap for next-generation

supercapacitors and presents novel perspectives on the ...

By understanding the fundamentals, advancements, and applications of supercapacitors, researchers, engineers, and policymakers can accelerate the development ...

This review provides an overview of the fundamental principles of electrochemical energy storage in supercapacitors, highlighting various energy-storage materials and ...

It is the site of the largest permitted battery energy storage system (BESS) on the continent at 2.8GWh, one of the largest under ...

Brussels, October 15, 2024 - Belgium has officially launched its largest battery energy storage system (BESS) to date, featuring a groundbreaking 50 MW/200 MWh capacity powered by ...
