Does Romania use Chinese technology in 5G networks?

In September 2019, the former US Ambassador to the European Union praised Romania for not using Chinese technology in its 5G networks. In January 2020, the US Embassy in Romania issued a statement emphasising that companies connected to an authoritarian government like China could not be trusted.

Where is 5G available?

Currently, the 5G network is primarily available in major cities, however, efforts are being made to expand coverage to other areas as well. It is expected that operators are already working on providing the 5G network to stadiums, airports, and other special premises. 5. What public tenders have awarded spectrum licences?

Which cities are covered by 5G?

Currently, 5G network coverage is limited to major urban centres including Bucharest, Cluj-Napoca, Oradea, Iasi, Sinaia, Busteni, Predeal, Timisoara, Craiova, Sibiu, Brasov, Poiana Brasov, Constanta and Mamaia. However, with the recent allocation of additional spectrum, we anticipate a wider roll-out of 5G services in the near future. 2.

What is a 5G corporate subscription plan?

One major telecom operator has introduced a specialised 5G corporate subscription plan, specifically for fixed-point 5G Wi-Fi solutions (note that the term "5G" refers to 5G mobile communications services and not a 5 GHz Wi-Fi router).

Orange Romania, leader of the local telecom market, has announced the launch of 5G+ technology in the Bucharest Metro.

Orange Romania announced the launch of the 5G+ technology in the Bucharest subway, becoming the first operator in the ...

It has been integrated into an existing cockpit that already includes internet performance statistics from all operators in a country, as well as access to speed-test results and coverage data.
