The ACT Government is driving a circular economy by expanding landfill gas capture at the Mugga Lane landfill, reducing emissions and providing reliable renewable ...

Canberra's Mugga Lane facility will capture landfill gas and generate electricity, adding two new generators and 12MW battery storage to power almost 11,000 homes.

Discover how shipping containers are revolutionising the Australian energy industry with modular solutions for battery storage, ...

When the ACT set an ambitious 2045 net-zero target in 2018, its further goal was to move away from a 1960s model, whereby major metropolises relied on massive, centralized ...

The Canberra Solar Energy Storage Power Station illustrates how technological integration can solve energy transition challenges. As battery costs continue declining (projected 30% by ...

Canberra, the capital of Australia, has made headlines by achieving a remarkable milestone: it has been powered completely by renewable energy since 2020. This ...

Since 2020, it has been 100% powered by renewables, secured through innovative power purchase agreements which have given Canberrans some of the lowest power bills in ...

When the ACT set an ambitious 2045 net-zero target in 2018, its further goal was to move away from a 1960s model, whereby major ...

Canberra's Mugga Lane facility will capture landfill gas and generate electricity, adding two new generators and 12MW battery ...

Energy generated from methane produced by Canberra's main rubbish tip is expected to power 10,800 homes and further cut greenhouse gas emissions under an ...

Discover how shipping containers are revolutionising the Australian energy industry with modular solutions for battery storage, portable substations, and solar energy systems.

The Big Canberra Battery will give the community energy security by keeping their power running, while helping reduce emissions. The large-scale battery will deliver at least 250 ...

Energy generated from methane produced by Canberra's main rubbish tip is expected to power 10,800 homes and further cut ...
