How much solar power does the DRC need?

There is also sufficient for the rural areas around Kinshasa, Mbandaka on the Congo river and the main port of Matadi. It can even be exported over the river to Brazzaville. Currently the DRC only has 2.5 gW installed and no early benefit from the Inga. However solar and wind is available now.

Does DRC have hydro power?

This has given it enormous potential for hydro electric power and almost 100% of its grid power is HEP. The DRC is the largest country in Sub Saharan Africa occupying 2,345,000 km² with 3.32% as standing water including rivers and lakes. Its sheer size, lush vegetation and landscape has been its problem since independence in 1960.

What was the main transport artery in the Congo?

When Europeans entered the Congo in the mid 19 th Century the Congo river was the main transport artery. During the Belgian colonial rule they operated a series of ferries that worked like a train service from Kisangani all the way to Kinshasa calling at each river port. Direct ferries are now long gone as there are major problems with navigation.

IZUBA is a solar energy company established in the Democratic Republic of Congo and headquartered in Goma / North-Kivu, that specializes in EPCM (engineering, procurement, ...)

His attitude was simply the flower of his general good-nature, and a part of his instinctive and genuinely democratic assumption of every one's right to lead an easy life.

To get to the small town of Kasongo, in Maniema province in eastern Democratic Republic of Congo, a solar panel must travel approximately 7,000 miles.
