California's statewide Demand Side Grid Support (DSGS) distributed storage program is projected to nearly double in capacity by 2028 and could provide up to \$206 million ...

Bidirectional distributed energy resources (DER) can generate, store, and flexibly draw energy from the grid. This shift places utilities at the center of new opportunities to ...

This report describes the effort undertaken to forecast distributed energy resource (rooftop solar and paired storage) adoption in California for rapidly emerging market segments.

Distributed energy resources (DERs) are modular technologies--such as batteries, rooftop solar panels, and smart ...

California's statewide Demand Side Grid Support (DSGS) distributed storage program is projected to nearly double in capacity by ...

Distributed energy resources offer multiple benefits to consumers, support decarbonisation, and improve resilience. The primary beneficiaries of DERs are the consumers who own them. ...

Distributed energy resources (DERs) are modular technologies--such as batteries, rooftop solar panels, and smart appliances--that generate or store energy on site at ...

Each microgrid includes options for solar PV, energy storage, and a backup generator. A Mixed-Integer Linear Programming (MILP) approach is used to find the cost ...

These publications--including technical reports, journal articles, conference papers, and posters--either focus

Distributed energy storage and electricity sales

on or were heavily ...

The US Energy Storage Monitor is a quarterly publication of Wood Mackenzie Power & Renewables and the American Clean Power Association (ACP). Each quarter, new industry ...

A small, innovative project that just came online in Los Angeles County shows the potential of aggregating distributed energy resources and how they can contribute to a more ...

This report presents the Z Federal and DNV analysis and data update for distributed generation (DG), battery storage, and combined-heat-and-power (CHP) technology and cost inputs into ...

These publications--including technical reports, journal articles, conference papers, and posters--either focus on or were heavily informed by the Distributed Generation Market ...
