How can the EU benefit from home-grown wind & solar?

EUobserver Coupling renewables and clean flexibility growth,the EU can benefit from abundant home-grown wind and solar,reduce dependence on imported fossil energy,and avoid costs.

What is the EU wind power package?

To accelerate wind energy manufacturing across Europe,the Commission presented the EU Wind Power Package in October 2023. It consists of 2 initiatives - the European Wind Power Action Planand a communication on achieving the EU's offshore wind ambitions.

Are renewable co-location projects coming to Europe?

However,the market for renewable co-location projects in Europe is still in its early stages. According to Aurora Energy Research,solar and wind farms with a combined capacity of nearly 1.2 gigawatts (GW) were operating in Europe in 2023 alongside large-scale battery storage.

How many energy storage projects are there in Europe?

The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be filtered by country, project status and technology. It lists 32 countries and is led by Germany, with 472 projects. It is followed by the United Kingdom (455 projects), Spain (147 projects) and Italy (112 projects).

We urge the European Commission to double-down on their efforts here and come forward with an EU Energy Storage Action Plan as part of a broader Energy System Flexibility ...

The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be filtered by country, project status and technology.

The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be ...

Coupling renewables and clean flexibility growth, the EU can benefit from abundant home-grown wind and solar, reduce dependence on imported fossil energy, and ...

Europe's largest co-location power plant is currently under construction by Spanish energy producer Endesa, also in Portugal, in Pego (province of Santa Cruz). The project ...

The new reports build on Mission Solar 2040 and emphasise the role of energy storage and system flexibility in delivering true energy security for Europe. The ...

To explore offshore sites further out to sea with stronger and more consistent winds, several European developers are working on floating offshore wind turbines. Multiple ...

EU's Clean Industrial Deal: what next for Europe's energy transition? The European Commission has unveiled its new strategy to ...

EU's Clean Industrial Deal: what next for Europe's energy transition? The European Commission has unveiled its new strategy to make EU industries more competitive ...

By embracing a holistic approach that integrates solar, wind, and energy storage, Europe can strengthen its energy independence, accelerate its decarbonization efforts, and ...

Europe's largest co-location power plant is currently under construction by Spanish energy producer Endesa, also in Portugal, in ...

These interviews explore energy storage business cases across the EU, demonstrating that these projects are viable, profitable and essential to achieving Europe's ...

By supporting battery innovation, hydrogen storage, and smart grid infrastructure, the EU is building a robust, resilient energy ecosystem aligned with its clean energy and climate ...

These interviews explore energy storage business cases across the EU, demonstrating that these projects are viable, profitable ...
