How many PV modules are in a solar container?
The innovative and mobile solar container contains 196 PV moduleswith a maximum nominal power rating of 130kWp,and can be extended with suitable energy storage systems. The lightweight,ecologically-friendly aluminium rail system guarantees a mobile solution with rapid availability. at full power.

What is a solarcontainer?
The Solarcontainer is a photovoltaic power plantthat was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system,a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

Why should you choose a modular solar power container?
Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations,power outputs,and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean,renewable solar energy.

How many households can a solar Container Supply?
Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany,the solar container can supply approx. 32 householdswith climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.
