For opening these files by dragging them into Fiji or selecting them via Bio-Formats Importer I use the following settings: Hyperstack; Open Files Individually; Color mode: Default; ...

Seems like Fiji thinks it is very helpful if it re- autoscales the image we just unscaled. The workaround is frustrating, in the Brightness and Contrast - Set display range I ...

Fiji Fiji is an image processing package -- a "batteries-included" distribution of ImageJ, bundling many plugins which facilitate scientific image analysis.

1 Introduction ImageJ is an open source image analysis program. The program provides a plugin framework for adding custom functionality. There are many analysis routines ...

Pressing Ctrl+O or navigating to the "Open" action in the "File" header causes Fiji to crash or close. Going to "Import" -> "Open with Preview" still works. Information about your ...

After starting Fiji, verify that QuickTime for Java is installed by selecting "Plugins > LOCI > LOCI Plugins Configuration", then choosing the "QuickTime for Java" entry in the list ...

Hello I am trying to run a batch process using a macro in ImageJ (using the Fiji version) and I get a Java warning when I try to batch save. The warning is a pop-up box with ...

I get the following exception when I copy the Red_And_Blue.java plugin included with ImageJ into Fiji.app/plugins and try to compile it in Fiji using Plugins>Compile and Run.
