What is a seafold container?

In maritime operations, SeaFold containers deliver substantial cost savings for one-way cargo shipments through more efficient loading and unloading procedures. Their design allows for additional stowage space on mainline and feeder vessels, which in turn reduces the vessel's time in port.

What is a returnable foldable large container (FLC)?

For improved space and capacity utilisation ORBIS has introduced a returnable foldable large container (FLC). The OceanPak plastic bins are stackable and collapsible when empty. That increases efficiency and minimizes transport costs during intercontinental shipping, especially during the return transport.

Are foldable containers a good idea?

Yes. It's that simple. It's true, all the big shipping lines and shippers have seen the full potential of our foldable containers. Cutting out inefficiency in the supply chain and hitting corporate sustainability goals as well. It's time for you to take responsibility.

How can reusable plastic containers reduce shipping costs?

The reusable plastic containers can be stacked to optimize storage room and folded to reduce volume. When full, a sea container can hold up to 60 bins. When empty and folded, even 160 units can be transported in one load. That increases efficiency and minimizes transport costs during intercontinental shipping.

When full, a sea container can hold up to 60 bins. When empty and folded, even 160 units can be transported in one load. That increases efficiency ...

These containers are available as general or temperature-controlled containers, depending on the customer's needs. Such standardized cargo containers have maintained ...
