Gel, coherent mass consisting of a liquid in which particles too small to be seen in an ordinary optical microscope are either dispersed or arranged in a fine network throughout the mass.

A gel is a semi-solid that can have properties ranging from soft to hard. Radiation causes a change in the colour of the gel. Gels are mostly liquid by mass, yet they behave like solids.

The meaning of GEL is a colloid in a more solid form than a sol; broadly : jelly. How to use gel in a sentence.

Gels consist of a solid three-dimensional network that spans the volume of a liquid medium and ensnares it through surface tension effects.

Universal II All Purpose Cleaner/Degreaser DAC-353 Cleaner None known DAC Industries, Inc. 1636 Gervais Avenue - Suite 9 Maplewood, MN 55109, USA T +1 (651) 748-1750 (Chemical ...

The 5-bit DAC features include: o Flexible input source (both positive and negative) o Selection of the DAC output, as a reference to the following internal peripherals: - DACxOUT1 pin - ...

This is the definition of a gel, a look at its properties, typical compositions, and examples of common gels

The user can shut down both DAC channels by using SHDN pin or shut down the DAC channel individually by setting the Configuration register bits. In Shutdown mode, most of the internal ...

GEL definition: a semirigid colloidal dispersion of a solid with a liquid or gas, as jelly, glue, etc. See examples of gel used in a sentence.
