Can you finance a battery storage system?

Recently, Peak Power conducted an energy storage finance webinar that focused on strategies available for financing battery storage system projects. The webinar aimed to provide valuable insights into financing options and strategies for these projects.

Who owns a battery energy storage system?

Archie discussed various ownership structures for battery energy storage systems. Third-party ownership involves a company like Madison Energy Investments financing and operating the battery while the savings are shared between the energy storage system owner and the host site.

Are battery energy storage projects financially viable?

Barrague highlighted different geographic markets where battery energy storage projects are financially viable. He emphasized that each market has unique price signals and market design constructs that allow for monetizing battery services.

What is a third-party energy storage system?

Third-party ownership involves a company like Madison Energy Investments financing and operating the battery while the savings are shared between the energy storage system owner and the host site. This option eliminates the upfront capital requirements and the need for system operation staff for the host site.

Battery energy storage projects face distinct technical challenges that complicate their development and financing. A key concern is the degradation of battery systems over time.

Despite all of the energy storage deployment, though, financing energy storage projects can be a mystery, clouded in uncertainty: how does ...
