-----

Combining an 18,000-watt pure sine wave inverter, 95A battery charger, and automatic transfer switch, this inverter ensures reliable and uninterrupted power for your home, business, or RV.

Sungoldpower 18000W 48V split phase inverter is built for the purpose of running the whole house, business office or large RV, which is perfect for ...

Powerhouse Performance: 18000W Continuous, 54000W Surge: The SGPWOSAY 18000W isn't just powerful; it's exceptionally powerful. The 18000W continuous rating means it can ...

Our full sine wave 18KW inverter works with very little power loss, outputs an average THD of 3%, its idle consumption is 270 watts, and its peak DC to AC efficiency is notably 90% The ...

Our 18KW inverter boasts minimal power loss, averaging just 3% THD (Total Harmonic Distortion), with an idle consumption of 270 watts. Notably, its peak DC to AC efficiency ...

? The split-phase inverter requires 240VAC input and can provide 120VAC or 240VAC output power for all kinds of appliances, and it can output 50 or 60Hz via the SW4.

High Power Output: 18,000W split phase pure sine wave inverter charger with 48V DC input and 120V/240V AC output, ideal for whole-house, commercial, or off-grid use.

This unit integrates a 48V inverter, an AC charger, and an auto-transfer switch into a single system, ensuring seamless and efficient power conversion and backup capabilities. Capable of ...

LFPV 18000W 48V split phase inverter charger is built for the purpose of running the whole house, business office or large RV. The split-phase inverter require 240V AC input ...

Our inverter is designed with AC priority by default. This means, when AC input is present, the battery will be charged first, and the inverter will ...

? The split-phase inverter requires 240VAC input and can provide 120VAC or 240VAC output power for all kinds of appliances, and it can output 50 ...

Sungoldpower 18000W 48V split phase inverter is built for the purpose of running the whole house, business office or large RV, which is perfect for using with renewable solar and using ...

Our inverter is designed with AC priority by default. This means, when AC input is present, the battery will be charged first, and the inverter will transfer the input AC to power the load.
