-----  
What is the Italian 5G plan?

The Italy 5G Plan, with an allocation of EUR 2.02 billion aims to incentivise the deployment of 5G mobile networks in areas of market failure. The Italian Strategy for Ultra Broadband 2023-2026 was approved by the Interministerial Committee for Digital Transition (CITD) on 6 July 2023.

When did 5G start in Italy?

In 2020 TIM and Ericsson launched 5G connected technologies at the Leonardo da Vinci Fiumicino Airport in Rome. In 2021 the government assigned EUR 2.02bn (USD 2.10bn) from the Italian Recovery and Resilience Plan to the application of the 5G Italy Plan.

What is a 5G infrastructure project in Italy?

In 2022, the Italian government announced a 5G infrastructure programme funded by the EU Recovery and Resilience Facility (RRF). Under this proposal, INWIT Infrastructure Wireless, a joint venture between Italian mobile operators Vodafone and TIM, has won six lots of funding with a combined value of EUR 345m (USD 359m).

What are Italy's upcoming 5G spectrum tenders?

Italy is actively involved in EU working groups to set common rules for spectrum sharing and usage. Within this framework, provided that the exact timeline has not already been finalized, expected tenders are as follows: Additional Bands for 5G: As noted, the 3.8-4.2 GHz band and the L Band (1.4 GHz) are expected to be auctioned around 2025-2027.

At Roma Termini station, customers of TIM, Vodafone (already active), and Iliad (to be activated by the end of December) will be able to quickly and effectively take advantage ...

Explore an expert analysis of 5G regulation and law in Italy, covering deployment, spectrum access, and

future plans. Essential for ...

When exploring the 5G industry in Italy, several key considerations come into play. First, regulatory frameworks are crucial, as the Italian government has established guidelines to ...

A 5G LTE Base Station is a wireless communication device that allows mobile phones and other wireless devices to connect to the 5G network and communicate with each ...

What is a 5G base station? 5G base stations operate on various frequency bands, including sub-6 GHz and mmWave, to deliver ultra-low latency, high data throughput, and enhanced capacity.

The "Italia 5G" plan, approved on 25 May 2021, by the Interministerial Committee for Digital Transition (CITD), is a strategic initiative designed to accelerate the deployment of 5G ...

The State aid scheme consists of two interventions. The first intervention involves the development of fibre-optic backhaul networks to connect the existing base stations ("BTSs"), ...

Italian mobile towers group Inwit said it has completed the installation of DAS (Distributed Antenna System) infrastructure at Rome's Termini station, converting it into the ...

Explore an expert analysis of 5G regulation and law in Italy, covering deployment, spectrum access, and future plans. Essential for telecom professionals.

Italy's 5G base station construction market is changing rapidly, catalyzed by technological progress, government initiatives, and rising demand for data services. With substantial ...

The Italy 5G Plan, with an allocation of EUR 2.02 billion aims to incentivise the deployment of 5G mobile networks in areas of market failure. The Italian Strategy for Ultra Broadband 2023-2026 ...
