---

The project will be constructed in two phases, with the first phase investing Yuan 3 billion to install lithium battery cells and modules BMS, PACK, Container and other production lines; The ...

The World Bank is inviting consultants to submit proposals for a technical study on a 350 MW to 400 MW solar project with battery energy storage in Tunisia. The deadline for applications is ...

The power station, with a 300MW system, is claimed to be the largest compressed air energy storage power station in the world, with highest efficiency and lowest unit cost as well. [pdf]

This system will lower energy costs, improve grid reliability during peak demand, and expand the rollout of renewable energy into the grid. Here's how it works and why it's unique.

This technology strategy assessment on compressed air energy storage (CAES), released as part of the Long-Duration Storage Shot, contains the findings from the Storage Innovations (SI) ...

Liquid air energy storage could be the lowest-cost solution for ensuring a reliable power supply on a future grid dominated by carbon-free yet intermittent energy sources, ...

The California Energy Commission has issued its final permit for the Willow Rock Energy Storage Center, a first-of-its-kind energy storage system capable of discharging at full ...

You know, when we talk about renewable energy in Africa, most people immediately think of solar farms in the Sahara or wind projects in Kenya. But here's the thing - the Lome photovoltaic ...

This system will lower energy costs, improve grid reliability during peak demand, and expand the rollout of renewable energy into the ...

Who Cares About Energy Storage? (Spoiler: Everyone) It's 3 AM in Lomé, Togo. A hospital's diesel generator sputters during emergency surgery. Meanwhile, 16km away, the ...

California's approval of a 500 MW energy storage project capable of delivering power continuously for up to eight hours underscores how rapidly long duration storage is moving ...
