Aluminium electrolytic capacitors are (usually) polarized electrolytic capacitors whose anode electrode (+) is made of a pure aluminium foil with an etched surface. The aluminum forms a ...

Electrolytic capacitors are small and readily available, but using them wrong could be an explosive failure. Learn how they work and how ...

The thin insulating layer of aluminum oxide formed on the anode between the foil plates acts as the dielectric, creating a high-capacitance device in a compact package.

This article describes aluminum electrolytic capacitors types, features, characteristics and behaviour. The primary strength of aluminum ...

Aluminum electrolytic, motor-start capacitors are non-polar and designed for intermittent operation in starting single-phase induction motors or for other brief AC applications such as motor-run ...

We produce a wide range of capacitors that deliver exceptional performance and reliability while standing up to demanding conditions. We seek to ...

Electrolytic capacitors are small and readily available, but using them wrong could be an explosive failure. Learn how they work and how to use them.

We produce a wide range of capacitors that deliver exceptional performance and reliability while standing up

to demanding conditions. We seek to continually improve our capacitors, driven by ...

Standard (non-hermetic) Flatpack capacitors, types MLP (85 μ F;C) and MLSG (125 μ F;C 5000 hours) have been used extensively in military/aerospace applications for more than 30 years.

These capacitors come in a wide range of capacitance values (0.1 μ F to 82,000 μ F) and voltage ratings (2VDC to 550VDC), offering different ...

The NPCAPTM is a Conductive Polymer Solid Aluminum Capacitor that uses highly conductive polymer electrolytic material. Please read the following in order to get the most out of your ...

These capacitors come in a wide range of capacitance values (0.1 μ F to 82,000 μ F) and voltage ratings (2VDC to 550VDC), offering different performance levels of ripple current, operating ...
