Are solar manufacturers circumventing antidumping and countervailing duty orders?

The solar market was further constrained by an ongoing petition before the US Department of Commerce alleging that certain solar manufacturers in Southeast Asia were circumventing antidumping and countervailing duty (AD/CVD) orders on solar cells and modules from China.

How do energy storage contracts work?

For standalone energy storage contracts, these are typically structured with a fixed monthly capacity payment plus some variable cost per megawatt hour (MWh) of throughput. For a combined renewables-plus-storage project, it may be structured with an energy-only price in lieu of a fixed monthly capacity payment.

How many utility-scale storage installations are there in 2022?

While total 2022 installations have not yet been reported, utility-scale storage installations in the second quarter were the largest quarter on record with 1,170 MW installed, despite significant delays in the market.

What is a PPA for new energy storage resources?

Some PPAs for new energy storage resources have been structured as capacity-only contracts in which the developer is responsible for the sale of energy and all costs associated therewith--including the costs of the required energy procured from the utility.

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), ...

Procurement is defined as the process of obtaining goods and services crucial to organizational operations and profitability. The difference between procurement, sourcing, and purchasing is ...
