What is a power plant container?

Fully equipped container designed for a power plant. The water is used for cooling water (8 m³/h), boiler water for high pressure steam turbine (6 m³/h) and drinking water. The container is insulated and equipped with door-in-door, light, and air-conditioning. The container includes the following plants:

Can a mobile water treatment plant be used in a container?

This customer needed to upgrade the existing water treatment plant, but no free space at site was available. Mobile water treatment in a container was the solution of choice. Cooling water treatment for a chemical company in Russia. The company chose a plug-and-play 8' container installation for the water treatment.

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.

What is a mobile water treatment container?

These mobile systems are installed inside a seaworthy 20 or 40 ft containers or in combination to form complete systems with advanced water treatment and purification technologies. Those mobile treatment containers units come with insulation, diamond flooring, LED lighting, climate control and service hatches.

Our high voltage energy containers can be tailored to meet specific operational requirements, ensuring that you receive a solution that is perfectly aligned with your business goals.

We're excited to present our innovative containerized energy storage system, the C& I-EnerCube, designed to

revolutionize high-capacity industrial ...

The researchers built and demonstrated two proof-of-concept prototypes at ORNL using carbon steel and carbon-fiber pressure vessels and supplied air and water as the ...

Our team delivers a wide selection of different water treatment systems that are converted into mobile units to meet your industrial and commercial ...

The researchers built and demonstrated two proof-of-concept prototypes at ORNL using carbon steel and carbon-fiber pressure vessels ...

Our utility-scale energy storage solution from 1 MWh and up covers the entire lifecycle, including demand analysis, system design, system integration, installation, commissioning, acceptance, ...

Request a customized energy storage system installation quotation, specify your project details to get tailored solutions.

Contact us today to schedule a consultation and explore how our tailored container solutions can meet your power and water utility needs. Visit our Power & Water Utility Containers page for ...

We have constructed many different custom-made water treatment plants in container adapted to specific demands and wishes. Please contact us for further information and to hear about your ...

A Better Foundation Solution For Energy Storage Systems. Helical pier foundations are quickly becoming a go-to solution to provide faster, safer, more efficient support for energy storage ...

We're excited to present our innovative containerized energy storage system, the C& I-EnerCube, designed to revolutionize high-capacity industrial battery storage for commercial and industrial ...

Our utility-scale energy storage solution from 1 MWh and up covers the entire lifecycle, including demand analysis, system design, system integration, ...

Our team delivers a wide selection of different water treatment systems that are converted into mobile units to meet your industrial and commercial needs. Check out our comprehensive list ...

Adding Containerized Battery Energy Storage System (BESS) to solar, wind, EV charger, and other renewable energy applications can reduce energy costs, minimize carbon footprint, and ...
