**When should you replace a circuit breaker?**

The main circuit breaker is a critical component of your home's electrical system, responsible for controlling the electricity flow and protecting the circuits from overloads or faults. Replacing it is necessary when it shows signs of wear or damage. 1.

**How do you change a circuit breaker?**

To change a circuit breaker, find the main circuit breaker box and locate the defective breaker by looking for a tripped breaker. Next, turn off the branch breaker boxes, the main power, and the individual breakers. Remove the screws holding the circuit panel's face plate, then loosen the screws holding the wires on the defective breaker.

**Do you need a professional to replace a circuit breaker?**

Rather, it's prudent to hire a qualified professional to complete a circuit breaker replacement to ensure it is installed safely and accurately. How long does a circuit breaker last before needing replacement?

**What should I do if I need a new circuit breaker?**

Replacement main circuit breaker - Smart breaker (if upgrading) 1. Safety First: - Turn off all appliances and devices connected to your electrical system. - Wear insulated gloves and goggles to protect yourself from electrical hazards. 2. Shut Off the Power: - Locate the main circuit breaker panel and shut off the main power supply.
