The Seychelles Energy Storage Station isn't just another infrastructure project - it's the backbone of an island nation's quest to marry sustainability with reliability.

Alex Thornton, operations director at Harmony Energy, gives us a deep dive into Pillswood, the biggest battery storage project in Europe, including the bold decision to be an early-mover into ...

That's the reality for Seychelles, where energy security used to mean smelling like a fuel tanker after a blackout. Enter the game-changing Seychelles shared energy storage ...

The solar farm comprises 14,850 PV panels installed over an area of about 50,000 square metres, three substations on Ile de Romainville, an undersea cable linking the man-made island to ...

But here's the kicker: these islands get over 2,200 hours of annual sunshine. So why aren't they energy-independent yet? The answer lies in storage. Enter the Seychelles Battery Energy ...

The inner goal included the sleep mechanism of the base station, and the optimization of the energy storage charging and discharging strategy, for minimizing the daily electricity ...

As the amount of renewable energy being produced in this island nation increases, the Seychelles' Public Utility Corporation (PUC) is seeking professional expertise to conduct a ...

Driven by the demand for carbon emission reduction and environmental protection, battery swapping stations (BSS) with battery energy storage stations (BESS) and distributed ...
