---

With 900 MW now installed, the country's solar sector is scaling rapidly. Prof. Dimitar Dimitrov stresses the need for storage, grid modernisation and policy reform to...

To compete with conventional heat-to-power technologies, such as thermal power plants, Concentrated Solar Power (CSP) must meet the electricity demand round the clock even if the ...

But hold onto your solar panels, because North Macedonia's capital is quietly becoming a photovoltaic energy storage pioneer. With 270+ sunny days annually and rising ...

We use our own calculation, which incorporates NASA solar and meteorological data for the exact Lat/Long coordinates, to determine the ...

Huld, T.; Gracia Amillo, A. Estimating PV Module Performance over Large Geographical Regions: the role of Irradiance, Air Temperature, Wind Speed and Solar Spectrum.

The first four projects are solar power plants Pehcevo and Stipion, cogeneration facility Skopje, and a photovoltaic plant with gas engines. In 2020, North Macedonia passed ...

Designed for solar power plants, this innovative solution combines advanced Lithium battery storage technology with a high-performance 500kW Hybrid Inverter. [pdf]

To access additional data, including an interactive map of global solar farms, a downloadable dataset, and summary data, please visit the Global Solar Power Tracker on the ...

We use our own calculation, which incorporates NASA solar and meteorological data for the exact Lat/Long coordinates, to determine the ideal tilt angle of a solar panel that will yield maximum ...

North Macedonia puts its biggest solar power plant into operation. The new photovoltaic system, the largest in the country, is located southeast of the capital Skopje.

With rolling blackouts becoming sort of a seasonal tradition, Skopje solar energy storage system manufacturers are stepping up to rewrite the rules. But how exactly do these systems work, ...
