---

Israeli Ministry of Energy and Infrastructure releases specifications for home solar systems, aims for 100,000 installations by 2030. Find out more.

Israel is set to implement one of its most significant renewable energy reforms to date, as a new Ministry of Energy regulation will require solar energy systems on the roofs of ...

Israel's new rooftop solar program is a critical component of the country's renewable energy strategy. With a target of 1.6 GW of capacity by 2030, the initiative will ...

Israel's new rooftop solar program is a critical component of the country's renewable energy strategy. With a target of 1.6 GW of ...

On December 11, 2025, a significant energy regulation officially took effect in Israel: all new residential buildings and certain types of towers are now required to install rooftop ...

In a move to boost clean energy, Israel will require rooftop solar systems on all new buildings starting December 2025.

As the Israeli government steps up efforts to encourage homeowners to produce their own electricity from rooftop panels, "Globes" investigates ...

As of September 2023, Israel has two solar-plus-storage projects, with the first being the Arad Valley 1's 17-MW solar farm with an energy storage system of 31 MWh, and the second being ...

The Israeli government has introduced a regulation requiring PV system installations on all new non-residential buildings with roof areas ...

Varied tariff options, shortened payback periods, tax incentives, and fast-track connection to the grid were among several ...

Learn about laws, government incentives, and technical requirements for installing solar systems. Optimize your energy project with our advice on current standards and best ...

The Israeli government has introduced a regulation requiring PV system installations on all new non-residential buildings with roof areas above 250 square meters and on new ...

Varied tariff options, shortened payback periods, tax incentives, and fast-track connection to the grid were among several steps announced Tuesday by the Energy Ministry ...

As the Israeli government steps up efforts to encourage homeowners to produce their own electricity from rooftop panels, "Globes" investigates the advantages and pitfalls.

OverviewHistory and developmentFeed-in tariffEducational and research facilitiesSolar power stationsFinance and businessSee alsoExternal linksIn 1949, the prime minister, David Ben-Gurion, offered Harry Zvi Tabor a job on the "physics and engineering desk" of the Research Council of Israel, which he accepted. He created an Israeli national laboratory and created standards amongst the different measurements in use in the country, primarily British, Ottoman and metric. Once the laboratory was established, he focused on solar energy for research and development.
