Solar System Planets. Astronomy articles on the eight planets, plus the two dwarf planets, Pluto and Eris. Great pictures of everything in the solar system. Updated daily.

Discovered over the summer, the comet known as 3I/Atlas will pass within 167 million miles of our planet on Friday. That's as close as it will get on its grand tour of the solar ...

Solar technologies are categorized as either passive or active depending on the way they capture, convert and distribute sunlight and enable solar energy to be harnessed at different levels ...

What is solar energy? Solar energy comes from the limitless power source that is the sun. It is a clean, inexpensive, renewable resource that can be harnessed virtually ...

Learn the latest about the exploration of our neighbors in the solar system, and check out stunning pictures of Mars, asteroids, Jupiter's moons, and more.

An interstellar comet first spotted passing through our solar system in July is beginning its departure from our corner of the universe -- but first it will fly by Earth, and ...

Since the interstellar comet was discovered July 1, a dozen NASA assets have captured and processed imagery of the icy interloper, and several others will have ...

Dive into the heart of our solar system with live, near-real-time images of the Sun, captured by the GOES-19, SDO, and other ...

Explore the advantages and disadvantages of solar energy, its sustainability, and environmental impact. Learn how it promotes energy independence despite some drawbacks.

Solar power works by converting sunlight into electricity through the photovoltaic (PV) effect. The PV effect is when photons from the sun's rays knock electrons from their atomic orbit and ...

If you're like most people, you've never heard of it. Meet the ringed asteroid-comet hybrid prowling the outer reaches of the Solar System.

Welcome to our daily Solar System update. Below, you'll find today's visualization showing the current positions of the planets as they orbit around the Sun.

NASA's on going watch on 3I/ATLAS, the third confirmed interstellar comet to pass through Solar System

The latest Solar System breaking news, comment, reviews and features from the experts at Solar System Coverage

Solar power is energy from the sun that is converted into thermal or electrical energy. Solar energy is the cleanest and most abundant renewable energy source available, and the U.S. ...

Dive into the heart of our solar system with live, near-real-time images of the Sun, captured by the GOES-19, SDO, and other NOAA/NASA satellites. Stay updated on the latest ...
