-----

Operating within a range of 5V-15V, it ensures efficient charging for 4.2V lithium batteries. This module integrates charging and protection features, ...

This board is meant to be everything you need to power your 5V electronics: simply connect a 500mAh or larger battery to the JST PH 2-pin port, then charge it when you can from USB or ...

Solar Energy Manager is a solar power management module, which can charge the 3.7V 18650 lithium battery through solar panel or USB port. The module features MPPT (Maximum Power ...

Optimize solar charging with the Xicoolee Solar Energy Manager Module, supporting MPPT, multiple power inputs, and battery protection for efficient energy use.

This polycrystalline solar panel operates at a voltage of 5V and delivers a current of 500mA, making it an ideal solution for charging cell phones, powering home lighting, and supporting ...

The module can provide up to 900mA charging current to 3.7V Li battery with USB charger or solar panel. The ON/OFF controllable DC-DC converters with 5V 1A output satisfies ...

Ideal mini power cells for science projects and other electronic applications, the compact size of the solar panel makes them suitable for a wide range of projects including ...

The Solar Power Management Module (D) is designed for 6V~24V solar panel, it can charge the 3.7V rechargeable Li battery through solar panel or Type-C connector, and provides 5V/3A ...

The module can provide up to 900mA charging current to 3.7V Li battery with USB charger or solar panel. The ON/OFF controllable DC-DC converters with 5V 1A output satisfies the needs ...

The Solar Energy Manager A is a solar power management module supporting charging of a 3.7V 18650 lithium battery via solar panels and USB. It offers a regulated 5V/3.1A output (with the ...

The Solar Energy Manager A is a solar power management module supporting charging of a 3.7V 18650 lithium battery via solar panels and ...

This solar charger controller module can take either 5VDC from Micro-B USB port or 4-6VDC from a solar panel and charge your battery banks when required. This is a super mini Solar Lipo ...

This solar charger controller module can take either 5VDC from Micro-B USB port or 4-6VDC from a solar panel and charge your battery banks when ...

Operating within a range of 5V-15V, it ensures efficient charging for 4.2V lithium batteries. This module integrates charging and protection features, making it ideal for solar-powered ...

This polycrystalline solar panel operates at a voltage of 5V and delivers a current of 500mA, making it an ideal solution for charging cell phones, powering home ...

This board is meant to be everything you need to power your 5V electronics: simply connect a 500mAh or larger battery to the JST PH 2-pin port, then ...
