Discover how solar and storage projects by Zelstra are shaping Chile's grid, enhancing reliability, and driving Chile's energy transition.

The first two phases of Oasis de Atacama, the largest solar power and energy storage project in Latin America, have come on stream in Chile's Antofagasta Region.

The most recent is 624 new solar panels at the company's satellite station facility in Santiago, Chile. The new power source is now ...

OverviewSolar thermal powerEarly photovoltaics projectsFurther readingIn June 2014, the 100-megawatt (MW) Amanecer Solar CAP, a photovoltaic power plant located near Copiapo in the Atacama Desert was inaugurated. It was developed by the company with the same name, Amanecer Solar CAP, and was the largest in Latin America at the time. It is capable of generating 270 gigawatt-hours (GWh) of electricity per year.

In June 2014, the 100- megawatt (MW) Amanecer Solar CAP, a photovoltaic power plant located near Copiapo in the Atacama Desert was inaugurated. It was developed by the company with ...

The pioneering facility, expected to begin operations in December, will mark the country's entry into satellite manufacturing and the independent development of space ...

With a target to achieve 100% renewable energy by 2050, the Chilean market has attracted a diverse array of international and local solar companies. This 2025 list ranks the top players ...

Multinational assurance and risk management provider DNV has helped renewable energy leader Zelstra secure close to \$300 million to channel towards the development of a ...

Multinational assurance and risk management provider DNV has helped renewable energy leader Zelestra secure close to \$300 million ...

The pioneering facility, expected to begin operations in December, will mark the country's entry into satellite manufacturing and ...

Among them is a 6,450-square-foot clean room for satellite manufacturing under strict environmental controls. There, engineers plan to assemble seven 50-pound ...

The most recent is 624 new solar panels at the company's satellite station facility in Santiago, Chile. The new power source is now supplying the facility with green electricity. The ...

There is a place in Chile's Atacama Desert where the power of the sun never seems to set. It is the Quillagua photovoltaic power plant, officially inaugurated on 8 April in ...

Establishing a solar module factory in Chile is a calculated, strategic investment, not a speculative venture. It leverages the country's economic stability, logistical prowess, and ...
