---

Atlas Renewable Energy plans to use its infrastructure to respond quickly to market developments and support companies facing high energy needs. The BESS del Desierto project could thus ...

That's the reality of hybrid energy storage projects in South America, where countries like Chile and Brazil are leading a renewable energy revolution. With ambitious climate goals and an ...

The energy paradigm in South America has witnessed significant shifts in recent years. Energy storage technologies have gained considerable momentum, providing solutions ...

South American governments are finally waking up to storage's potential. Chile's Decree 112 now requires all new solar farms above 50MW to include 4-hour storage capacity. Meanwhile, ...

The energy paradigm in South America has witnessed significant shifts in recent years. Energy storage technologies have ...

Recently, a 25MWp photovoltaic energy storage project undertaken by Sano Energy at a South American mine successfully achieved its first grid connection and power generation.

With projected revenues of nearly \$5.9 billion by 2030--up from \$680 million in 2023--the region is poised for a rapid and uneven expansion in storage markets across utility ...

Outside of North America, the South American energy storage market is growing at an impressive rate. More and more companies are looking at South America and harvesting ...

CATL has already made its mark in Brazil, powering the country's first utility-scale storage project, the Registro Energy Storage Project, in 2022. After three years of stable ...

South America is the continent most dependent on renewable energy, but it is a market that has been difficult for the energy storage ...

South America is the continent most dependent on renewable energy, but it is a market that has been difficult for the energy storage industry to penetrate - most South ...

As South America's renewable energy sector accelerates toward decarbonization, battery energy storage systems (BESS) have emerged as critical enablers for grid reliability ...
