-----  
What is Spain's battery storage market?

Spain's battery storage market is dominated by customer-sited systems. Utility-scale storage remains nascent. Currently, Spain's storage market is mainly composed of small-scale batteries co-located with solar PV. Spain's household electricity prices now stand at over EUR 0.30/kWh on average.

Is price arbitrage a viable business model in Spain?

Price arbitrage is not yet sufficiently attractive in Spain as a stand-alone business model.<sup>30,31,32</sup> Revenue stacking is currently not allowed.<sup>33</sup> The risks with regard to double charging remain unclear.<sup>34</sup> Capacity markets are not yet attractive for developers of storage assets in Spain.

Does Spain have a storage market?

Currently, Spain's storage market is mainly composed of small-scale batteries co-located with solar PV. Spain's household electricity prices now stand at over EUR 0.30/kWh on average. In addition, Spain's reliance on fossil gas has increased price volatility in recent years.<sup>16,17,18,19</sup>

Does Spain have a storage policy?

However, the government is developing new schemes to incentivise storage deployment, including adapting capacity markets under a new scheme named 'Renewable Energy Economic Regime'. In addition, Spain has recently introduced subsidies specifically for storage systems co-located with solar PV.<sup>35</sup>
