-----

China's experiments in clean energy can feel like living in the future. Even when things don't quite work.

China is adding more solar and wind power to its energy grid than any other economy - but that huge buildout has its challenges. Here's what we can learn

China is changing the world's power game. In May 2025 its solar farms made over 100 terawatt-hours (TWh) in one month. That is about one-third of all the power the United ...

China is accelerating its energy transition at a pace exceeding its own projections: by 2024, it had already reached the wind and solar capacity projected for 2030, with over ...

24 March 2025 NEWLY INSTALLED CAPACITY IN CHINA In Jan-Feb 2025, China added 53.7GW of new power capacity to the grid, a 3% yoy increase. Of this, new solar power ...

China is the dominant force in next-generation energy technologies today. It's pouring hundreds of billions of dollars into putting renewable sources like wind and solar on its ...

China contributed more than half of the global increase in both solar and wind generation. China is the world's largest electricity consumer, in 2024 accounting for a third of ...

China is the dominant force in next-generation energy technologies today. It's pouring hundreds of billions of dollars into putting ...

China is changing the world's power game. In May 2025 its solar farms made over 100 terawatt-hours (TWh) in one month. That is ...

These figures reflect energy consumption -- that is the sum of all energy uses including electricity, transport and heating. Many people assume energy and electricity to mean the same, but ...

China is accelerating its energy transition at a pace exceeding its own projections: by 2024, it had already reached the wind and solar ...

The solar thermal energy storage power station can generate electricity with or without direct sunlight, thanks to heliostats and molten salt, while achieving stable all-day ...

As the world shifts towards renewable energy, off-grid solar power systems have gained significant traction, especially in China. These systems provide a sustainable solution ...
