How proactive digital engagement can help governments, insurers and providers improve health outcomes and cut costs in healthcare systems around the world.

Interests: model-based systems engineering and integration; systems modeling, analysis, and design of cyber-physical systems and digital twins; algorithms and computational tools for ...

Systems requires that authors publish all experimental controls and make full datasets available where possible (see the guidelines on Supplementary Materials and references to unpublished ...

Traditionally, systems thinking support has relied on an ever-increasing plethora of systems tools, methods, and approaches. Arguably though, such support requires something ...

Urban air and water pollution is complex. Cities must adopt systems thinking to tackle these challenges, boost equity and build long-term resilience.

The growing need for sustainable energy solutions has propelled the development of Hybrid Renewable Energy Systems (HRESs), which integrate diverse renewable sources ...

About Systems Aims Systems (ISSN 2079-8954) is an international, peer-reviewed journal on systems theory, practice and methodologies, including fields such as systems engineering, ...

Systems publishes Special Issues to create collections of papers on specific topics, with the aim of building a community of authors and readers to discuss the latest research and develop ...

The Internet of Things is currently one of the fastest-growing branches of computer science. The development
